EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Specification, line 7: "pending" has been deleted and replaced with --now U.S. Pat. No. 6,647,292--.

Specification, line 10: "pending" has been deleted and replaced with --now U.S. Pat. No. 6,721,597--.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or suggest an ICD comprising a housing, and an electrode disposed on the housing and electrical circuitry or cardioversion defibrillation circuitry coupled to the electrode, and the housing having first and second segments each having an insulating plate at an end of the respective first and second segments, and each segment having a conductive plate coupled to the insulating plate, where the conductive plate of the first segment is coupled to the conductive plate of the second segment to form a unitary implantable device where the insulating plates separate the conductive plates from the electrode.

3. If the device of Volz were modified to have an electrode located on the housing (most likely located on housing portion 10), when screw 20 is tightened the conductive plate (18) would contact conductive plate (top portion of 10) at the respective left and right sides. Thus, the

insulating plates (16, 26) would not separate the conductive plates (10, 18) from the electrode that would most likely be located on housing portion (10).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
